Notes:
1. The base value of $59,000 (zone 1, household size 4) was based on the 2017 Yellowknife Market Basket Measure. The Market Basket Measure is the official poverty line in Canada.
2. The base value was allocated across household size by using the same formula used by Statistics Canada: Threshold size n = base value * (SQR(n)/2). This formula accounts for the cost sharing of resources; a 4 person household does not necessarily have double the costs of 2 person household.
3. The thresholds by zone were based on the average Living Cost Differential of the communities in each zone.
4. Communities were categorized into 3 zones by grouping areas with similar Living Cost Differential values.

Notes:
1. The $500 contribution thresholds were calculated by adding the following amounts to the no contribution thresholds:
   - Zone 1: $2,000
   - Zone 2: $2,500
   - Zone 3: $3,000

   It is assumed the cost of a lawyer increases across zones, but that the cost is the same for all households within each zone.

</table>

**Notes:**

1. The $750 contribution thresholds were calculated by adding the following amounts to the no contribution thresholds:
   - Zone 1: $3,000
   - Zone 2: $3,750
   - Zone 3: $4,500

   It is assumed the cost of a lawyer increases across zones, but that the cost is the same for all households within each zone.

2. The amounts added were based on the proportional increase in the contribution level; a 50% increase in contribution level implies a 50% increase in the amount added.

Notes:

1. The $1,000 contribution thresholds were calculated by adding the following amounts to the no contribution thresholds:
   - Zone 1: $4,000
   - Zone 2: $5,000
   - Zone 3: $6,000

   It is assumed the cost of a lawyer increases across zones, but that the cost is the same for all households within each zone.

2. The amounts added were based on the proportional increase in the contribution level; a 33% increase in contribution level implies a 33% increase in the amount added.
