2. Form 81-106F1 *Contents of Annual and Interim Management Report of Fund Performance* is amended in Item 3 of Part B by
 - (a) striking out the sentence “This information is derived from the Fund’s audited annual financial statements.” at the end of the introduction in subsection 3.1(1);

The net assets per security presented in the financial statements differs from the net asset value calculated for fund pricing purposes. [An explanation of these differences can be found in the notes to the financial statements./This difference is due to [explain].]
- (2) Net assets and distributions are based on the actual number of [units/shares] outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of [units/shares] outstanding over the financial period.
- (3) Distributions were [paid in cash/reinvested in additional [units/shares] of the Fund, or both].

- (c) repealing the “*Ratios and Supplemental Data*” table in subsection 3.1(1) and substituting the following:

Ratios and Supplemental Data

	[insert year]	[insert year]	[insert year]	[insert year]	[insert year]
Total net asset value (000's) ⁽¹⁾	\$	\$	\$	\$	\$
Number of [units/shares] outstanding ⁽¹⁾

Net asset value per [unit/share]	\$	\$	\$	\$	\$

- (1) This information is provided as at [insert date of end of financial year] of the year shown.
- (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.
- (3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

 - (b) If an investment fund invests in securities of other investment funds, calculate the trading expense ratio using the methodology required for the calculation of the management expense ratio in section 15.2 of the Instrument, making reasonable assumptions or estimates when necessary.”;
 - (g) repealing subsection 3.1 (13) and substituting the following:
